

Billings City Administrator Weekly Report

September 26, 2025

- 1. Incinerator Incident** – We continue to work with DEQ, Northern Industrial Hygiene, Newman Restoration and Yellowstone Valley Animal Shelter to ensure the safe use of the Animal Control/YVAS building.
- 2. Park and Recreation News** – Please see the attached Amend Recreation Center weekly update. The PRPL Project Progress Report is also attached.
- 3. TDS/CEC Update 9/22/25 – 9/26/25**

Update from CEC 9/22/2025

I wanted to provide you with an update following the repair work. The lines have successfully held full pressure during testing, and no issues have been observed since pressurization. We will continue to monitor the line throughout the day to ensure the integrity of the repair holds steady under sustained pressure. If the line continues to perform without issue through today's monitoring, we will move forward with backfilling and restoring the affected sections.

PRPL Director update 9/22/2025

PRPL has directed CEC not to do any backfilling until lateral lines can be checked. Once lateral lines are pressurized there is a chance that the main may not hold. PRPL staff have been checking laterals today and will most likely finish this work on Tuesday. If all goes well, we plan to have water running Tuesday afternoon. I will provide more information tomorrow morning once I have been given an update from CEC and PRPL staff.

PRPL staff update to CEC staff 9/22/2025

Parks staff is sending water into lateral lines this morning. The focus will be starting at Oly 5 where the meeting was held last week and have those zones operating by end of today. As staff activates and charges lateral lines, they will report any issues and then proceed to the next area. It will take staff a couple of days (end of Tuesday) to activate and check all the irrigation zones. It is recommended to wait for any restoration work until all areas are checked.

Update from CEC 9/23/2025

The Parks Department was able to begin cycling valves yesterday and made good progress. By 4:30, they had completed a large portion of the system. When the 3/4" lateral valve at 36th Street was turned on, however, the lateral line developed a leak. The good news is that the main line held pressure throughout 2 days without issue. The leak on the lateral is a small fix and will be completed this morning. Nearly all zones have been successfully fired off, and this was one of the last remaining sections.

Update from CEC 9/24/2025

The lateral line was repaired yesterday and allowed to sit throughout the day to let the glue cure. Parks will pressure the system back up this morning and will continue opening zones and testing integrity throughout the day. Thank you again for meeting with me on site yesterday. We plan to move forward with restoring all locations this week, provided the line continues to hold as expected.

Update from CEC 9/25/2025

The fitting replaced on Tuesday developed a small leak and was swapped out with a new one. We believe the issue was due to a manufacturing defect in the original fitting. We will pressure the line back up this morning. The plan is still in place to begin restorations this week.

Update from CEC 9/26/2025

I want to let you know that all zones have been tested and are holding. Sprinklers operated throughout the day yesterday without any issues. The lines were left pressurized overnight so we can walk them out this morning and confirm they held during that time. With everything performing as expected, we plan to begin restorations today.

Update from PRPL Director 9/26/2025

Oly 5 (location where City leadership met with citizen) is fully operational. Restoration of the area will proceed. Updates will continue until all work has been completed.

4. **2025 Council Meeting Schedule** – Please review the attached draft agendas and provide any feedback regarding the order of business, modification of agenda items, or other changes to the consent or regular agendas. City code requires a specific order of business as it relates to certain items on meeting agendas, e.g., placement of public hearings first on the regular agenda, so your feedback will be incorporated with those code requirements in mind. ([BMCC](#))

2-214) Work session agendas are more flexible and can also easily be modified by the mayor with the consensus of Council during those informal meetings.

5. Next Week's Meetings/Task Forces

- a. North Park Task Force, Wednesday October 1st 7:00 PM, North Park Community Center.
- b. Council Operation Committee, Thursday, October 2nd 4:00 PM, Rimrock Conference Room, 316 N. 26th Street, 5th Floor.

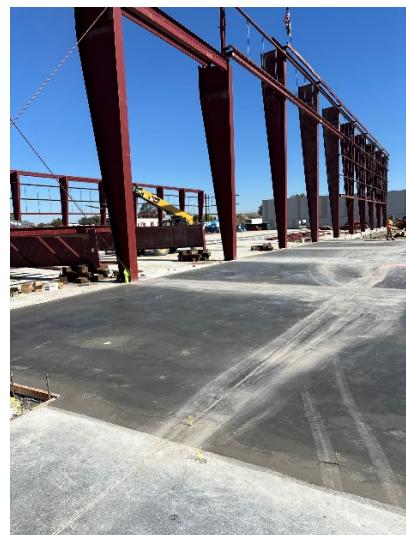

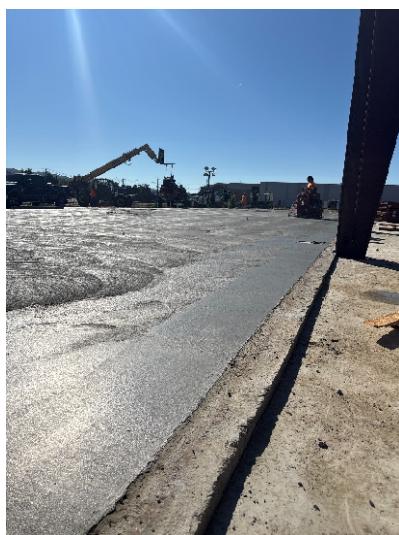

Amend Recreation Center: Weekly Update

9/26/2025
